+++ PUSH-MESSAGE TO YOUR SMARTPHONE +++

Dear Business Partner

Did you know that it is very easy to get an **error message from your steam bath sent directly to your smartphone via push message?**

The prerequisite is that your smartphone has an internet connection. This makes it possible to get feedback quickly for large spa parks or remote installations. This is possible with Condair Omega, Spa Control, AT4D and Omega Pro if they are connected to the Logicmachine.

The Logicmachine app must be installed on iOS or Android on your smartphone.
You can find the detailed instructions in the attachment of this e-mail.

Best regards

Sebastian Klein
