+++ OMEGA PRO AND CONDAIR GS WITH UL CERTIFICATION +++

Dear Business Partner

Omega Pro with UL certification

Condair GS with UL certification

We would like to inform you that our electric steam humidifier **Omega Pro** with the patented scale management is also available with a UL certification for projects in North America. Our mother company Condair produces the same model under the name **Condair RS** at our production site in Ottawa. In case you need technical datas or prices, please get in touch with us.

Condair GS:

Did you know that Condair also provides a full range of gas units? They are also UL certified. Gas units are quite interesting regarding cost of ownership as the cost of gas compared to electricity is in many countries less which means more efficiency.

Best regards

Spencer White
